(54) Title: ELECTROLYtic DEVICE AND METHOD FOR DISINFEcting WATER IN A WATER SUPPLY SYSTEM BY MEANS OF THE GENERATION OF ACTIVE CHLORINE

WO 03/055806 A1

(57) Abstract: The present invention relates to an electrolytic device for disinfecting water in a water supply system using active chlorine, comprising an electrolytic cell having electrodes and a generator driven by the water, a part of the water being guided through the electrolytic cell and at least a part of the feeding of the electrolytic cell being guided through a salt dosing device containing a compound capable of supplying chloride ions to the water.
